

Velda Fish Feeder PRO

Automatic fish feeder

Short facts:

- Spiral feeding mechanism
- 3 l volume
- For pellets from 3 up to 12 mm
- Wall-mounting or with soil-skewer

Optimal feeding with the SENECT control technology and the Velda Fish Feeder Pro.

With the Fish Feeder Pro, connected to the actuator output ports of SENECT control units, you can feed your fish intelligently and tailored to the needs of your fish.

The spiral feeding mechanism allows you to use different grain sizes and different feed types.

The Fish Feeder Pro will be delivered without the Velda control unit, but with a 5 m cable for connecting the feeder to the SENECT control units.

Technical information	
Dimensions	app. 220 x 400 x 120 mm
Material	Plastics
Feed grainsize	3 to 12 mm
Power consumption	< 1 W (engine idle)
